Many parking lot solutions from other companies can only be used in specific parking environments.

That's why all of our parking solutions can be used in indoor or outdoor parking lots and can be modified for multi-level or multiple-lot configurations. Whether you are a University campus, municipality or healthcare campus, we have what you need for smarter, safer lots.

Indoor Lots

Outdoor Lots

Multi-Level Lots

Multi-Lots

P Parking Guidance

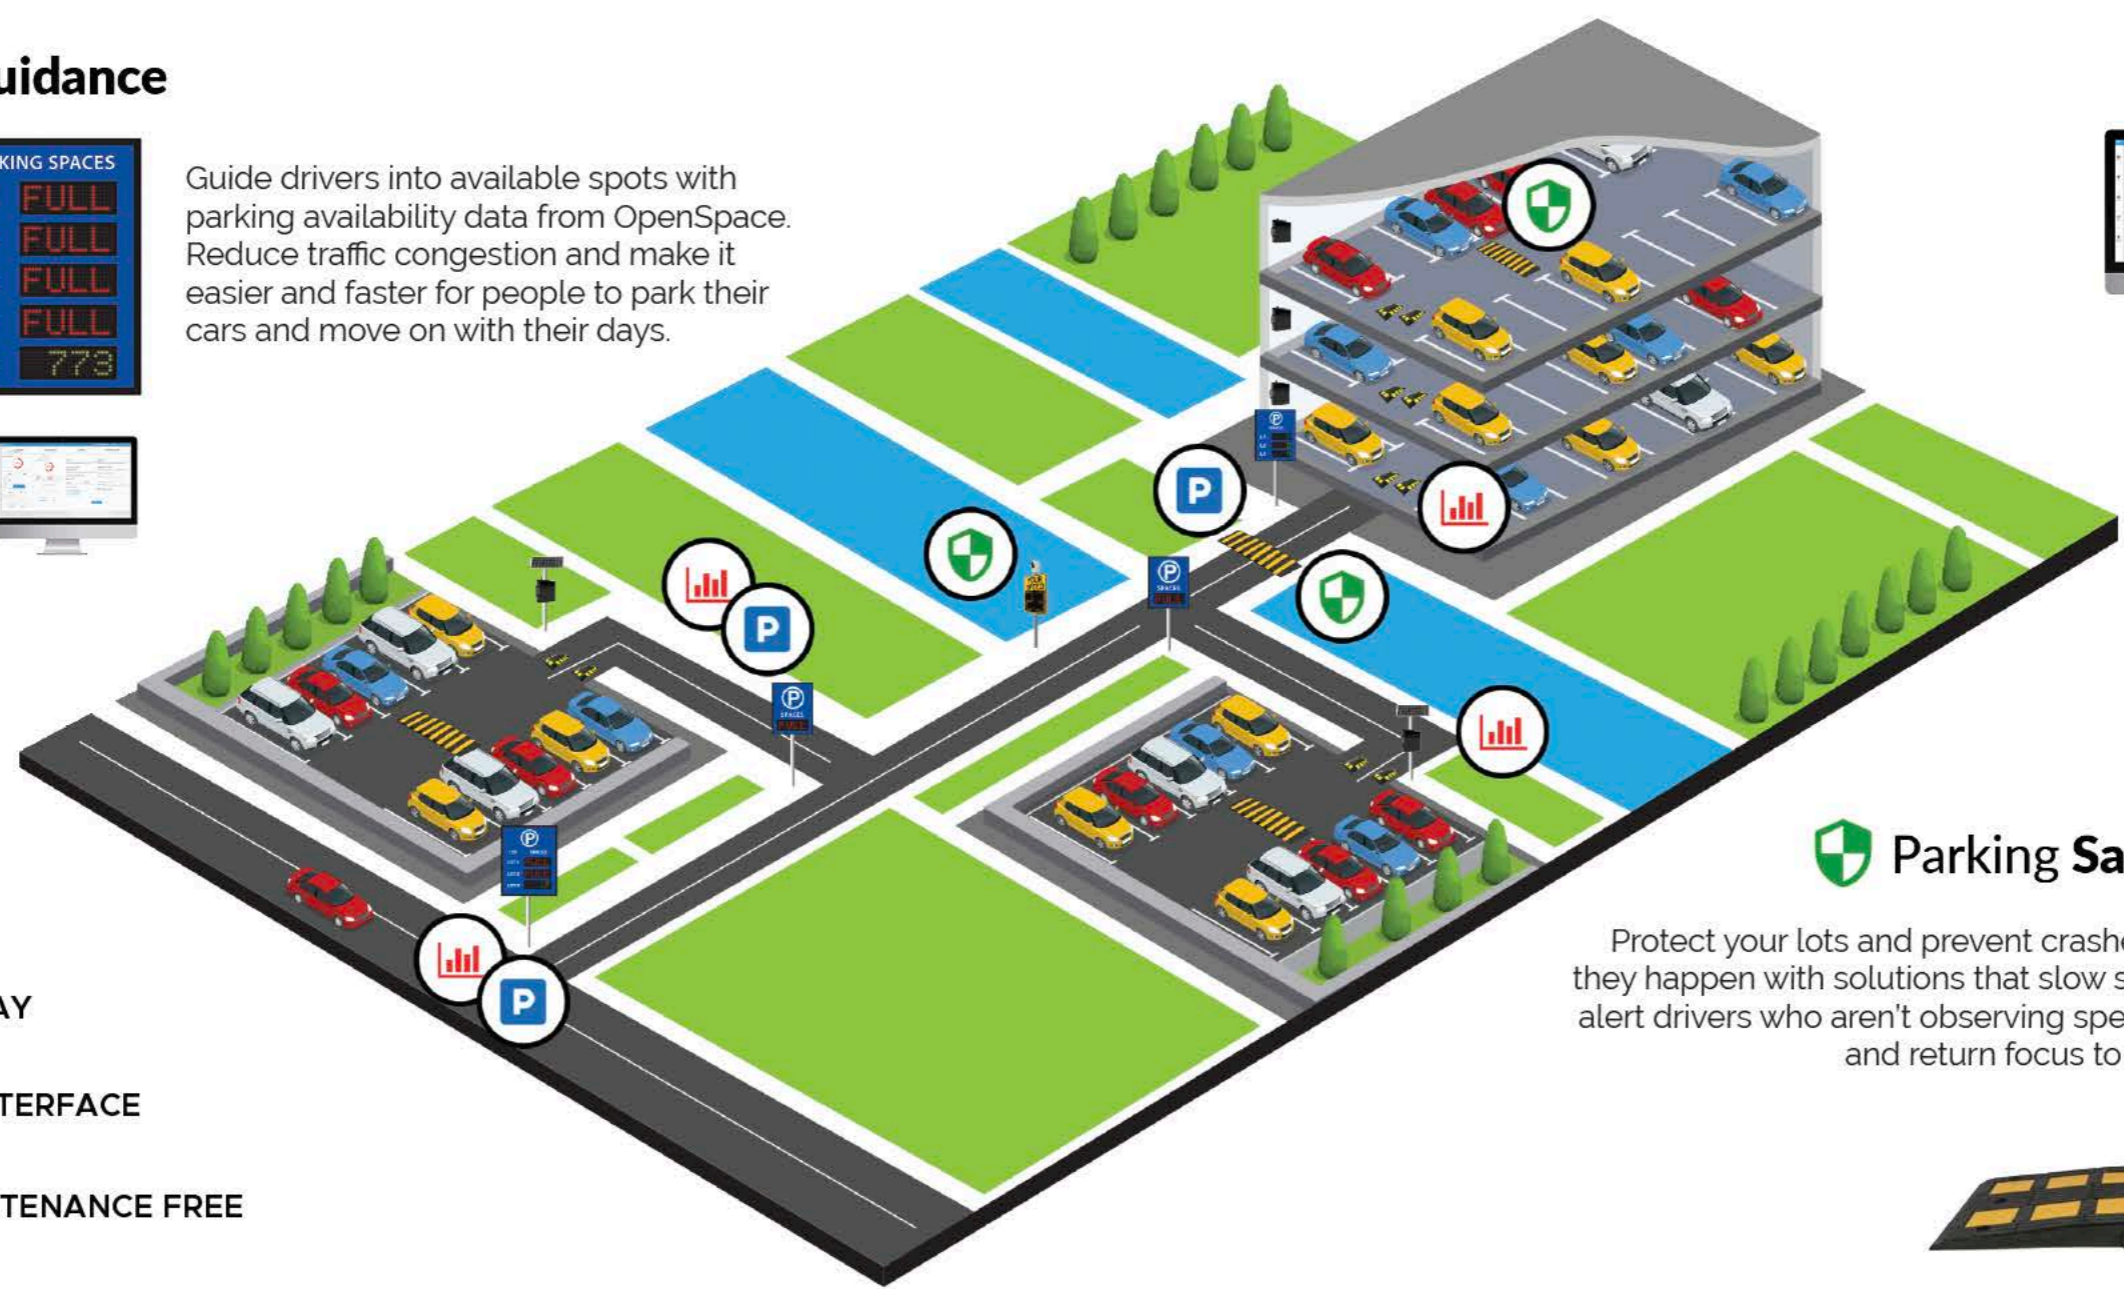

Guide drivers into available spots with parking availability data from OpenSpace. Reduce traffic congestion and make it easier and faster for people to park their cars and move on with their days.

Bar Parking Data

Make smarter, better informed decisions about how to manage your parking lot resources with data solutions that give you the statistics you need about how your lots are used every day.

- PLUG & PLAY**
- UNIFIED INTERFACE**
- 100% MAINTENANCE FREE**

Shield Parking Safety

Protect your lots and prevent crashes before they happen with solutions that slow speeders, alert drivers who aren't observing speed limits, and return focus to the road.

Maximize parking lot and garage utilization with smarter parking data and insights.

Whether you're using data to **plan for future lots, garage expansion**, to decide **how many permits to sell**, or simply to **assess parking needs**, we have what you need for **smarter lots**.

Full range of affordable data solutions.

Ingress and egress data collection.

Robust reports for analysis.

Remote access to data and statistics.

Parking availability data accessible by app.

All your data,
one **intuitive interface**.

Find out more about how simple it is to access your parking data in the cloud.
